Re: Letter of Endorsement

Dear Mr. Steer,

Executive Producer

Les Stroud

After reviewing the website, the safety scenarios and standard Wilderness Spirit would like to endorse the program you are offering to outdoor enthusiasts and those working in rural/wilderness settings.

As a "survival" expert I can tell you that in emergency situations the satellite phone and a spatial location provides a level of confidence, not only for the user, but for the people who may have to provide assistance.

Safety is of paramount importance and the GPS certification program will better prepare both people for working in and those utilizing our natural resources for recreational reasons.

We look forward to working with you in promoting this "level safety consciousness."

Sincerely,

Les Stroud
Wilderness Spirit
