MAP CONCEPTS

Mr. Bill Steer
National Green Check GPS Certification Program
C/o Canadian Ecology Centre
Box 430
Mattawa. ON POH 1V0

Re: Trak Map Concepts Endorsement of Green Check

Dear Mr. Steer,

Trak Map Concepts is pleased to endorse and recommend the Green Check GPS Certification Program to our customers.

We are in the business of creating and supplying the best digital mapping software to the general public through a variety of applications.

The proper use of the GPS unit requires a basic understanding of the relationship that includes the map, the compass and the GPS unit.

The Green Check programs and its network of instructors across Canada promotes this relationship through the standards and conventions within its training.

Trak Map Concepts is working closely with the Green Check program as we believe consumers need to have the best, detailed mapping software for their GPS units. Knowing where you are with a digital representation is a key component to navigation as highlighted by Green Check.

GPS is a tool of science and resource management, but we salute the Green Check program for its promotion of GPS as a tool of safety!

Trak Map Concepts is impressed with the certification and the many private and public sector organizations that have embraced the Green Check program. Green Check participants receive a preferred discount when they choose our mapping software. Check out both websites of Trak Map Concepts and the Green Check program at <http://greencheckgps.ca>.

Sincerely,

Normand Legault
President.
